1. The preliminary amendment filed on February 6, 2006 has been entered.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gaber et al (U.S. Patent No. 5,375,642). Gaber et al disclose a screening arrangement comprising slats 16 having projecting portions 40,52 and recesses 36,38, a headrail 12, a lift cord 26, ladder cord 20,22, a sealing strip 14, and a locking housing 68.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 18 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gaber et al. As to the limitation of third and fourth projecting portions, to have utilized additional projecting portions such as those disclosed by Gaber et al is nothing more than a duplication of existing parts and as such cannot be relied upon for patentability.

4. The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Love et al, Shiue, Abe, Hong, Gaber et al '459.
